PROJECTS

CryptoLand [↗](#)

Developed **Cryptoland**, a sleek and responsive web platform built with React JS and Tailwind CSS, enabling users to explore, track, and engage with cryptocurrencies. Focused on delivering a seamless user experience with fast loading times and modern design principles

My Portfolio [↗](#)

This is my personal portfolio, and I'm continuously working on it to make it more polished and impressive

Event Management System [↗](#)

This project is a Management System that I developed with the help of ChatGPT. It utilizes React.js for the front-end, Node.js with Express for the back-end, and MongoDB as the database.

NFT market place [↗](#)

Developed an NFT marketplace using React, enabling users to explore, buy, and sell. The platform includes features like wallet integration, item listings, and a responsive design optimized for desktop and mobile users.

Education platform (Landing page) [↗](#)

It's a online learning platform, It's a landing page. I use reactjs and tailwind here.
